BUILDING WORKS

Over half term, you may have noticed that work has started to take place in the school grounds. Over the next 6 months, there will be a few changes internally to the building which will renovate current classrooms, add an additional classroom and create a library in school. We are looking forward to the changes but apologise in advance for any disruption this may cause.

PHASE 1

The bungalow will be used as a Year 5 classroom during the building work. As a result, a taller fence has been erected around the area and a secure path/ gate is being installed. Children will always be escorted by staff when moving between the buildings. They will still be accessing playground/ hall and dining hall.

PHASE 2

This work will be taking place in KS2 intervention areas & Miss Mortons's previous classroom. An additional classroom will be created by renovating a current classroom, the PE cupboards & KS2 kitchen area. This will create 2 classrooms both with their own external doors.
Breakfast Club will still be available as usual - children will continue use Overdale Hall, classrooms and outside for physical activities.

PHASE 3

This work will be taking place in KS2 extension. This area will create 2 classrooms each with their own external door. There will be toilets and a cloakroom area. This will create an additional classroom for school.

PHASE 4

The final phase of the building works will be a purpose built library which will enable the whole school to enjoy high quality books and enjoy story time in a relaxing environment. The KS2 corridor will be reconfigured to create this wonderful space.
